

Welding Glove Savers

A **Glove Saver** is designed to do what its name says, “save your gloves”. By wearing a glove saver, you provide additional radiant heat protection to the back of the hand as well as additional abrasion and wear protection to the palm area.

Standard Glove Saver

Features

- Aluminised back to reflect radiant heat
- Chrome leather palm and cut off thumb area.

Part Number	Description	Size
AGS4L	Left Hand	LRG
AGS5L	Right Hand	LRG

Reinforced Glove Saver

Features

- Aluminised back to reflect radiant heat
- Chrome leather palm and cut off thumb area
- Back reinforced with an extra layer of leather.

Part Number	Description	Size
AGS10L	Left Hand	LRG
AGS11L	Right Hand	LRG

High Heat Glove Saver

Features

- Double layered back
- Outer Layer – Woven aramid
- Inner Layer – Aluminised Preox
