

Product Data Sheet

Nomex Reinforced Structural Firefighting Jacket

Elliotts' Structural Firefighting Systems and protective apparel are designed to be comfortable, breathable, lightweight, highly visible, allow the wearer to move freely and offer the highest possible overall protection in the hazardous fire fighting environment.

The Australian based design, construction and structural system features have been created to protect the wearer from the extreme conditions faced by structural firefighters.

Features

- "Y" style coat design to provide ease of mobility and minimum coat rise
- Articulated sleeves for greater movement
- Coat hanging loop for drying
- Contoured collar designed for maximum thermal protection
- Thermal throat tab with hook + loop closure
- Two large gusseted pockets with hook + loop flaps and drain holes
- Heavy duty zipper with 50mm hook + loop closure system on outside storm flap for extra heat and moisture protection
- Sleeves feature knitted Nomex wristers for added protection
- Reflective trim - 50mm yellow/silver firetrim
- Padded and reinforced shoulders and elbows.

Certifications and Standards

These garments are certified by BSI to AS 4967:2019 Protective clothing for firefighters. Requirements and test methods for protective clothing used for structural firefighting.
