

## Product Data Sheet

# Nomex Structural Firefighting Hoods

### Features

- Made from 20% Nomex and 80% FR Viscose Blend with a 20cm bib
- The hood is a full two-layer construction throughout the head and bib area
- All seams are sewn with 100% Nomex thread and an 8 thread flatlock safety stitch is used for both durability and a comfortable flat butt seam.

### Certifications and Standards

This garment is consistent with NDPA 1500, Standard on Fire Department Occupational Safety and Health Programs, and 29 CFR 1910.132, General requirements for Subpart 1, Personal Protective Equipment.
