

Welding Screens - Imported

The Elliotts Imported welding screens absorb the dangerous ultraviolet light that is emitted from the arc welding process. The Elliotts welding screens are manufactured from a vinyl film, processed with a colour dye, a flame retardant, and an ultraviolet absorber.

Features

- Surrounding your welding situations with safety
- Protecting your co-workers and other people from the painful effects of accidental welding flash
- Safely and quickly defining hazardous welding areas
- Allowing safe observation for a safety check of welding operations
- **All seams are sewn**
- **Fitted with metal eyelets every 200mm**
- **Complete with hang ties & curtain rings.**

Drop	Width	Part Number Red	Part Number Green
1800mm	1800mm	STS1818IR	STS1818IG

Welding screens and frames are sold separately.
